Kehr Surgical Private Limited
The smart choice for sharp blades

CM/L-0001755967

Our company

Kehr Surgical Private Limited has been manufacturing superior quality surgical blades in Surgeon Brand since 1970. Exports have contributed significantly to sales since 1975. We export to more than 80 countries.

The confidence of leading Surgeons and hospitals worldwide is testimony to the Company's ability to supply high quality blades at very competitive prices.

We are proud of our ability and history of not only producing high quality world standard surgical blades but also having the distinction of producing a wide range of specialized blades.

Our products

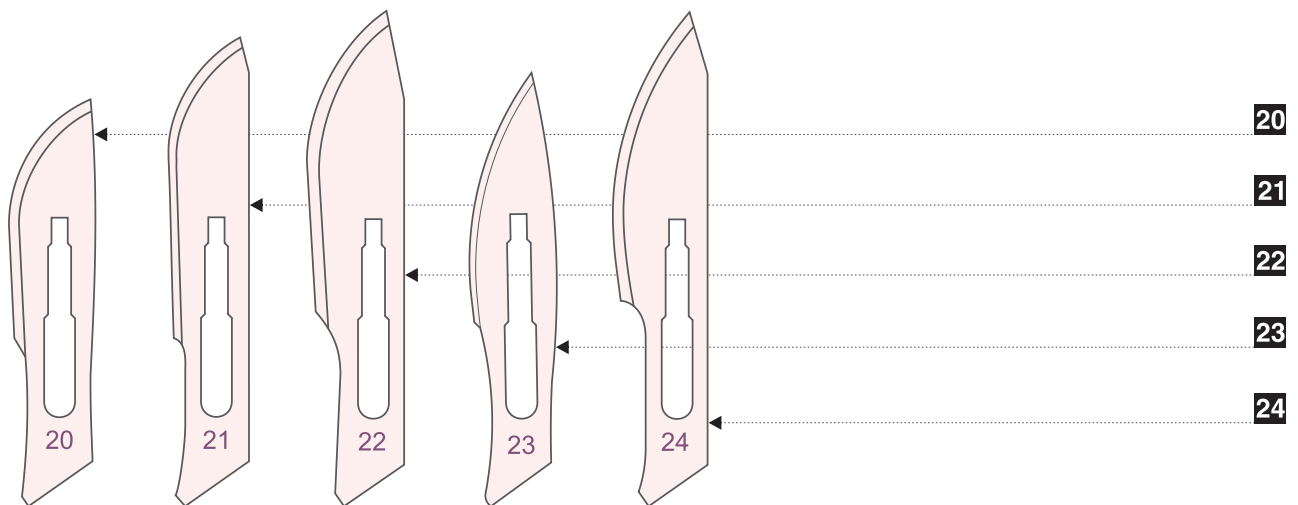

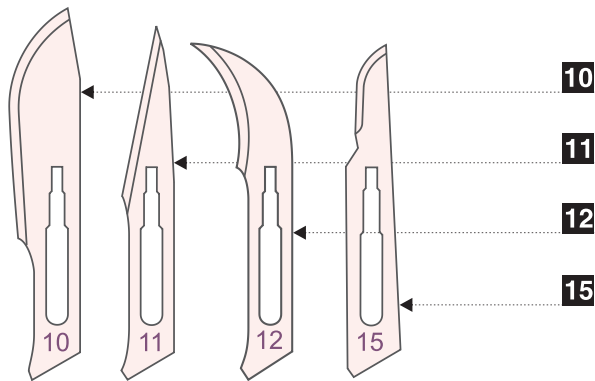

CE Marked surgical blades and disposable scalpels are available in both carbon steel and stainless steel. The blades are manufactured in the following sizes: 10,10A, 11,12, 15, 18, 20, 21, 22, 23, 24, 25 and 36. The Company also has the ability to manufacture other sizes as per customer requirements. The blades are packaged in individual aluminum foil pouch, which are then packed in lots of one hundred and sterilized by gamma radiation. The scalpels pouches are packed in boxes of ten.

We are also able to offer several models of Stich Cutters and special purpose blades.

Our manufacturing

At Kehr Surgical Private Limited product quality and process parameters are stringently monitored and controlled at each and every stage of production. Bar codes is used for identification and product traceability.

The facility is ISO 13485:2016 certified. We recognize the importance of continued improvements in process capability in order to achieve the objective of keeping up our reputation as a leading quality supplier. The medical devices are packed in a class 100000 clean room.
